

Excellent rampsystem

Probably the strongest rampsystem in the world !

On the 4th of April Excellent Systems performed an unusual pressure test in association with the Danish defence forces armoured division. The result speaks for itself.

Special thanks to:
Jydske Dragonregiment
for supplying soldiers and
tank for the pressure test...

A combat ready Leopard Tank with a weight of 62 tonnes climbed an Excellent System ramp leaving nothing but dirt from the caterpillars. Testresult: **Excellent !**
